Press release

ERIS LLC will take part in Intersec Dubai

Intersec will take place on 19–21 January 2020 in the Dubai International Convention and Exhibition Centre (DICEC).

ERIS LLC will showcase the possibilities of the portable gas detectors [PG ERIS-414](#) with an option of GPS positioning via Bluetooth or the LoRaWAN protocol and the SOS button [ERIS S-Point](#). Besides, the company will present the fixed single-channel gas detectors DGS ERIS 200 Series, including the sensor-gas analyzer wireless model [DGS ERIS-210-RF](#) employing wireless solutions.

In addition the company will present two new products: dual and four channel gas detectors [Advant 2](#) and [Advant 4](#). The detectors are intended to measure the concentration of explosive, toxic gases, oxygen, carbon dioxide, volatile organic compounds in the air of the working area.

The list of products that will be presented at the exhibition includes the multi-channel controller [SGM ERIS-130](#) receiving signals from ERIS and other most common gas detectors.

ERIS stand location: 4A32, hall №4, Dubai International Convention and Exhibition Centre (DICEC).

Write or call us to agree on the meeting time on the stand:
